March 01, 2005

Dear Mr. Tuteja,

It gives me pleasure in recommending the Electric Blanket, the winter relief item developed and put forward for commercialization by student of this university.

The product developed by you has good potential and is an item of need in this part of the country, and other areas where temperature goes below 20 degree and senior citizens feel uncomfortable. It is also a relief to the patients of winter ailments and that too at such an economical expenditure.

I wish you could come out with an over blanket too, so that one could have a relief for weighty quilts which the elderly people find difficult to handle.

I wish you success in life.

Yours etc.

To,

Mr. Nitin Tuteja,
Medico Pharmaceutical Processors,
